

For all domestic hives in the EU

Justification for national hives in the EU on human rights

The Faroe Islands are autonomous with its own laws, but is subject to the Danish legal community.

Human rights are applicable in the Faroe Islands, with the same conditions as the other Kingdom with the difference that human rights are not respected on the islands.

Every time Denmark, complained to the Strasbourg Court, making the Kingdom's courts and Danish institutions to great lengths to sabotage these complaints have resulted in that no complaint has been taken up by the Court in Strasbourg ever.

It is therefore surprising that the Faroes no complaint has been admitted by the Court, while all other Nordic countries have won more cases before the Court.

As a journalist I have for several years been frustrated by not getting the same rights as journalists in Denmark proper and other countries, and thus a new complaint unconstitutionally is rejected, I have to state this for national hives.

I have regularly received sentences of other named persons opinions, because the Danish authorities proven exercise censorship in order to close the newspaper.

I want to make Member States aware of the Faroe Islands in no way benefit from the human rights, as also that rejection is clearly of a political nature.

Attached complaint with documents.

Sincerely,

Dan Klein, journalist
Faroe Islands
