

To Whom It May Concern

The Government of Greenland is in cooperation with Amplexa Genetics A/S, Sverigesgade 24, 5000 Odense, establishing Covid-19 testing facilities in Greenland.

The project is of vital importance to Greenland. Greenland is an isolated island with few resources to handle an epidemic of Covid-19. Testing capacity is urgently needed if the present situation is to be handled.

I therefor kindly ask you to prioritize Amplexa Genetics A/S and supply them with the necessary equipment and other supplies needed to set up PCR testing fir Covid-19 in Greenland.

Do not hesitate to contact me directly if you have any questions.

Yours Sincerely

Henrik L Hansen
